

DOCRIL T

SOLAR PROTECTION

Roll length:	60 m	(65 yards)
Application:	Awning	

PROPERTIES

Composition:	100% Solution Dyed Acrylic		
Width:	120 cm	(60")	
Weight:	340 g/m ²	(10,03 oz/yd ²)	UNE 40339
Water penetration resistance:	≥ 65 cm H ₂ O		UNE EN ISO 811
Resistance to surface wetting - Spray Test:	100 note (max. 100)		UNE-EN ISO 4920
Oil Repellency:	≥ 5		AATCC 118
Warp/Weft tensile strength:	150/80 daN/5 cm		UNE-EN ISO 13934-1
Warp/Weft elongation at break:	≤ 20/≤ 20 daN		UNE-EN ISO 13934-1
Warp/Weft tear strength:	3/2,5 daN		UNE-EN ISO 13937-2
Colour fastness to artificial light:	≥ 7 note blue scale (max. 8)		UNE-EN ISO 105-B02
Colour fastness to artificial weathering:	≥ 7 note blue scale (max. 8)		UNE-EN ISO 105-B04
Colour fastness to seawater:	5 note (max. 5)		UNE-EN ISO 105-E02
Colour fastness to chlorinated water (from pools):	5 note (max. 5)		UNE-EN ISO 105-E03

Tolerance +/- 5% average values. Non-contractual information. The data are result of tests performed in our laboratories.

For more technical information, please contact us at info@citel.es

CARE&CLEAN

Maintenance instructions: Remove dust with a vacuum cleaner, without rubbing. Clean with a sponge or a soft brush dampened with water and soap.

When used in awnings, it is very important to allow the fabric to dry completely before roll it up

WARRANTY

5 years

Made in Europe

El tejido Docril® T incorpora un recubrimiento interior con nano-cápsulas suspendidas cuyas partículas absorben parte del calor que genera la radiación solar al impactar sobre el tejido, creando una atmósfera más fresca y cómoda. Este revestimiento está especialmente diseñado para maximizar el aislamiento térmico y contrarrestar el elevado consumo energético. Alcanzando un ahorro energético del 8% del consumo por cada grado de temperatura reducido.**

Gracias a la acción de las nano-cápsulas, se consigue que la transmisión solar (Ts) sobre el tejido disminuya considerablemente. Por consiguiente, el Factor Solar - Gtot se reduce hasta un 50%, (ver tabla superior). Haciendo que la temperatura bajo del toldo se reduzca hasta un 10% en comparación a un toldo acrílico normal (ver gráfico inferior). Logrando una temperatura de sombra absoluta. Además, cabe añadir que la protección UV alcanza su máximo del 100%.

*The Docril® T fabric incorporates an inner coating with suspended nano-capsules whose particles absorb part of the heat generated by sun radiation when it hits the fabric, creating a cooler and more comfortable atmosphere. This coating is specially designed to maximize thermal insulation and counteract the high energy consumption. Achieving an energy saving of 8% of consumption for each degree of temperature reduced.***

Thanks to the action of the nano-capsules, the solar transmission (Ts) on the tissue is greatly reduced. Therefore, the Solar Factor - Gtot is reduced up to 50%, (see table above). Then, the temperature under the awning is reduced up to 10% compared to a normal acrylic awning (see graphic below). Achieving an absolute shade temperature. In addition, it should be added that the UV protection reaches its maximum of 100%.

**Factor solar (gtot) / Solar factor (gtot): Es la relación entre la energía solar que incide desde el exterior de una ventana y la que se transmite al interior de la habitación. / The relationship between the solar energy which impacts on the outside of a window and the total energy which is transmitted to the inside of a room.
